

DENTAL INSTRUMENTS CATALOGUE

Nicecraft

Manufacturers & Exporters of Dental, Surgical & Beautycare Instruments.

Dear Valued Buyers

We feel immense pleasure to present our latest catalogue in which we have featured a most comprehensive range of all types of quality Surgical & Dental instruments required for day to day use for Hospital. We will be pleased to quote you a competitive Price and Delivery time.

All instruments are manufactured according to the recognized standard patterns currently in use in Hospital throughout the world and are being produced under restrict control of experts to avoid any flaw and to refrain any complaint at any stage.

A group of very vast experienced persons in manufacturing handling our quality Control System.

Any instruments proven defective in workmanship or material will be replaced with out charges.

We express our thanks to all our customers for the confidence they have placed us in the past. We further assure them that we will continue our best efforts to gain their confidence in the future.

We are always at your service.

Extraction Forceps Function

Dental forceps are pliers-like instruments that are used to grasp teeth.

A dentist will usually have a number of different ones on hand, each having a design that's tailored to: The specific shape of the tooth it's intended to remove (such as incisors vs. molars having two roots vs. molars having three roots).

The location of the tooth in the mouth (such as front vs. back, or left lower molar vs. right upper molar.) How they're used.

A dentist will grasp a tooth with their forceps and then firmly and deliberately rock it back and forth as much as it will.

Because the bone that surrounds the tooth is compressible, the socket will gradually start to expand.

As it does, the range of the dentist's side-to-side motions will increase.

In addition to this rocking motion, the dentist will also rotate the tooth back and forth.

This twisting action helps to rip and tear the tooth away from the ligament that binds it in place.

At some point, the socket will be enlarged enough, and the ligament torn away enough, that the tooth can be easily removed.

Handle Selection For Extracting Forceps

Dear Valued Buyers if any Universal Fig. No. of Extracting Forceps not Found in our Catalogue you Can Refer the Fig. No. From These Diagram.

FUNCTION OF ROOT ELEVATORS IN SURGERY

To Loosen Tooth or Root From Bony Socket Prior to Placement of The Extraction Forceps.

Dental Root Elevators To look at one of these instruments you might mistake it for a narrow screwdriver. That's because just like one an elevator has a handle and then a specially designed "blade" or tip portion. How they're used.

The tip of an elevator is designed to be wedged into the ligament space between a tooth and its surrounding bone (as shown in our animation).

As the elevator is forced into and twisted around in this space, the tooth is rocked around and pressed against the walls of its socket.

This helps to both expand the shape of the socket and separate the tooth from its ligament.

As this work is continued, the tooth gradually becomes more and more mobile.

In some cases, the dentist may be able to completely remove the tooth just using their elevator. If not, they will choose a point where they feel they have accomplished as much as they can with it and will then switch to using extraction forceps.

HANDLES FOR ROOT ELEVATORS POINTS A, B, C, D, E, F, G, H

Our Scalers

Compare our scalers and curettes with the best in the industry and you will immediately recognize we are equal in every way but one... price. Note the deep precision knurling for better tactile feel. The same high-grade stainless steel tips, the same light weight (under 18 grams) for less hand fatigue, the same professional craftsmanship, and surpassing the highest industry standards. of course, any manufacturer can make these claims, but we guarantee and certify ours.

- Beautiful, blasted finish on center bar.
- Deep chamfer-out, knurling for better non-slip control.
- Titanium coated color to protect the hand against stains.
- CNC machined for excellent balance, precision and consistency.
- 3.8 mm diameter for easier handling and better tactile sensitivity.
- Better control throughout the slip.
- Easily balanced for consistent control when switching from tip to tip.
- 128 mm length of handle without tip.

- Beautiful, blasted finish on center bar.
- Deep chamfer-out, knurling for better non-slip control.
- Titanium coated color to protect the hand against stains.
- CNC machined for excellent balance, precision and consistency.
- 3.8 mm diameter for easier handling and better tactile sensitivity.
- Better control throughout the slip.
- Easily balanced for consistent control when switching from tip to tip.
- 128 mm length of handle without tip.

- Beautiful, blasted finish on center bar.
- Deep chamfer-out, knurling for better non-slip control.
- Titanium coated color to protect the hand against stains.
- CNC machined for excellent balance, precision and consistency.
- 3.8 mm diameter for easier handling and better tactile sensitivity.
- Better control throughout the slip.
- Easily balanced for consistent control when switching from tip to tip.
- 128 mm length of handle without tip.

- High-polish mirror finish tip.
- Manufactured within the guidelines of the FDA quality assurance system for good manufacturing practices.
- Highest grade German stainless steel, case sharp, durable tip.
- Rockwell hardened to 53 HRC.
- 27 of the most popular designs from groups to McCalla to Colquhoun, and many European patterns.
- All instruments are guaranteed against defects in material and workmanship.
- All instruments bear the CE mark, indicating of the European Community's highest standards.
- Customer satisfaction guarantee: 100%.
- Case from 20 grams ... lightweight for less hand fatigue.
- Manufactured to the most exacting standards in the 150+ instrument you buy is exactly the year first.
- You decide ... Why pay more for the same high-quality instruments?

- Beautiful, blasted finish on center bar.
- Deep chamfer-out, knurling for better non-slip control.
- Water based blasted protect the hand against stains.
- CNC machined for excellent balance, precision and consistency.
- 3.8 mm diameter for easier handling and better tactile sensitivity.
- Better control throughout the slip.
- Easily balanced for consistent control when switching from tip to tip.
- 128 mm length of handle without tip.

VALUED BUYERS

Compare our scalers and curettes with the best in the industry and you will immediately recognize we are equal in every way but one... price. Note the deep precision knurling for better tactile feel. The same high-grade stainless steel tips, the same light weight (under 20 grams) for less hand fatigue, the same professional craftsmanship, and surpassing the highest industry standards. Of course, any manufacturer can make these claims, but we guarantee and certify ours. We regularly manufacturing below articles in showing handles & pattern A to L for better grip & perfection. We are also fully equipped & capable to develop these instruments as per your own specific requirements & demands in materials, sizes, shapes and patterns.

Maxillofacial Surgery Instruments

A Bard-Parker handle with a No. 15 blade is the usual scalpel used to make incisions on the gums where a flap can be raised to gain access to tooth.

Retractors

Tongue, cheek and flap retractors are needed to provide adequate access to the tooth and are legion in number.

Needle Holders and Sutures

Sutures are used to replace and secure the gum flap in its former position, to limit the size of the wound and therefore restrict subsequent contamination with food debris, and to assist in controlling bleeding. The usual suture size for intra-oral work is 4/0 and the material may be absorbable or non-absorbable Scissors Dissecting scissors and suture-cutting scissors are usually used.

Artery Forceps

These are designed to hold soft tissue without damaging it. College tweezers are used to lift up sutures prior to removing them.

Periosteal Elevators

A number are available and are similarly used like a normal elevator but periosteal elevators have two heads – one at each end. One end is sharp-tipped to expand the tooth socket while the other has a blunt end to remove granulation tissues or raise a gum flap.

Chisels and Mallet

Chisels are more appropriate in the operating theater and are particularly useful for disto-angular third molars and upper wisdom teeth extraction.

Bone Curettes

The Mitchells trimmer is probably the most valuable instrument in the category and is used to remove granulation tissue in the tooth socket.

Bone Rongeur and Bone File

Used to smoothen any sharp bone edges after tooth extraction is done.

Orthodontics Pliers in Clinical Dentistry Orthodontics And Dentofacial Orthodontics

Driven by the demand for tooth alignment, general practitioners are increasingly being asked to provide orthodontic treatment.

Dentists keen to participate in this area of expertise need to demonstrate the skills to identify suitable patients, the ability to provide conventional and contemporary orthodontic treatment and be aware of its limitations.

This is exactly what this programme delivers, along with the vital core competencies to excel in this unique postgraduate area.

The objective of the Orthodontics and Dentofacial Orthopaedics is to provide dental surgeons with the core knowledge and clinical skills essential for the delivery of competent, high-quality dental care.

It encompasses a blended learning approach and consists of a combination of lectures, seminars, workshops, clinical case discussions and laboratory sessions.

The flexible modular structure enables the programme to meet a wide range of student needs.

Thermoplier Pliers

- At the core of the Clear Aligner In-Office treatment are the Thermoplier Pliers. • The Pliers are used to create or modify force points, to create space, to create slots or to form hooks in aligners.
- Force points generate pressure to gently move teeth into the desired position. • Heat Pliers prior to using. • Autoclavable. • Patent #6,293,790
- Purchase as single pliers or as a set #8253B Maxillary and Mandibular Plier Set

		Purpose / Indication	Position on Aligner	
		24-138 Red Thermoplier® Undercut Enhancer Pliers	Adjust loose aligners by tightening/extending plastic at interproximal points	Undercut areas/ embrasures on both sides of the aligner alternating undercuts
		24-139 White Thermoplier® Maxillary Tooth Moving Pliers	Tip or rotate larger teeth	Center of the target tooth
		24-140 Blue Thermoplier® Mandibular Tooth Moving Pliers	Tip or rotate smaller teeth	Center of the target tooth
		24-141 Yellow Thermoplier® Micro-Ramp Pliers	Tip, torque or rotate smaller teeth laterally; Allow contact close to incisal edge	On the correct location on the target tooth
		24-142 Purple Thermoplier® Mesial-Distal Pliers	Lateral movement of both posterior and anterior teeth; Allow contact close to incisal edge	Appropriate interproximal areas
		24-143 Gray Thermoplier® Large Circle Pliers	Increase the size (diameter) of a large existing force point; Elevate H.I.T.® Hooks off of teeth	In the area around the force point or hook
		24-144 Pink Thermoplier® Small Circle Pliers	Increase the size (depth) of small existing force point	Location of the existing force point
		24-145 Black Thermoplier® Bite Plane Pliers	Make bite plane aligners without acrylic	On the resulting mark from articulating paper
		24-146 Brown Thermoplier® Bubble-Forming Pliers	Create additional space in the aligner for the target tooth to move into	The location opposite force point on target tooth

			<p>24-147 Hole Punch Plier Designed to place a round hole in any location on the aligner with one simple squeeze. When placing a hole in the aligner it is not necessary to heat the plier or the aligner, saving time chairside. Punch portion of the tip is a ha</p>
			<p>24-148 An instrument created to add a notch at the gingival margin of clear aligners anywhere elastic hooks are required within the arch. The Tear Drop provides a reservoir to hold the elastics in place as the patient is seated. This permits easier manipulation of elastics by the patient.</p>
			<p>24-149 The Horizontal instrument produces an indentation to accent individual root torque. It also serves a second purpose by enhancing retention of either clear aligners or retainers by placing an indent into a tooth's undercut or below a bonded attachment.</p>
			<p>24-150 Correcting rotations is often a challenge with aligners. The Vertical emphasizes over-correction of rotations by producing an indentation at the mesial or distal line angles on the facial and/or lingual of a specific tooth. As an option, a rotational couple can also be created using vertical indents on facial and lingual surfaces on opposing sides of a tooth. The Vertical can also be used to produce an indent to produce a mild "nudge" to enhance resolution of in-and-out discrepancies.</p>
			<p>24-151 Designed to place a round dimple in any location on the aligner. No heat necessary to achieve the dimple. Simply squeeze the plier on the desired location to achieve the dimple. Due to the design of the dimple plier it will not distort the aligner during placement.</p>
			<p>24-152 Dimple Erasing Plier This Plier is used to remove protrusions and dimples on the aligners. Simply place the beak on the dimple and squeeze closed to flatten.</p>

PLIERS FOR ORTHODONTICS & PROSTHETICS

- Щипцы для ортодонтии и протезирования
- Щипці для ортодонтії та протезування

Aligner Pliers are specially designed to prevent distortion of the aligner without the need to heat the plier. These pliers allow greater torque, rotational control and increased retention.

Family Name: Orthodontic Pliers

Intended Use: The plier is used for applying a hole or shallow indentation on the orthodontic Aligner. Its use is limited to dental orthodontic treatments.

Thermal and Non Thermal Pliers.

Non Thermal Pliers

The Hole Punch Plier
24-153 Punch Size 6mm
24-154 Punch Size 5mm
24-155 Punch Size 4mm

The Hole Punch Plier is used to cut half moon shaped hole at the gingival margin of the clear aligners. These half circles permit the addition of bonded buttons, bonded orthodontic tubes or brackets with associated hooks or as simply used to relieve impingement of plastic on soft tissue.

THE HORIZONTAL / Torque Plier
24-156

The Horizontal Aligner Plier creates a horizontal indentation, for individual root torque. It also enhances retention of either clear aligners or retainers by placing an indent into a tooth's undercut or below a bonded attachment.

THE VERTICAL / Rotation Plier
24-157

The Vertical Aligner Plier creates a vertical indentation for individual tooth rotation. The Vertical can also be used to produce an indent to produce a mild "nudge" to enhance resolution of inandout discrepancies.

PEARL DOT Smooth 1 mm / Retention Plier
24-158
PEARL DOT Smooth 2mm / Retention Plier
24-159

The Pearl Dot Smooth Aligner Plier creates a circular indentation, 1 mm in diameter, for increased retention in retainer and aligner system.

TEAR DROP/ Key Hole Cutter
24-160

Tear Drop plier cuts tear-shaped notch or hook at gingival margin of clear aligner. It provides a reservoir to hold the elastics in place as the aligner is seated. This permits easier manipulation of elastics by the patient.

Dimple Erasing Plier
24-161

This Plier is used to remove protrusions and dimples on the aligners. Simply place the beak on the dimple and squeeze closed to flatten.

Instruments for dental implants are made of high quality stainless steel. Our line of instruments include, but is not limited to, the following products:

Bone Grafting Instruments

- Bone Curettes (SPRATT) – designed for harvesting bone
- Bone Grinder – used in conjunction with a mallet to grind bone into appropriate particle sizes
- Bone Basin – weighted bottom design prevents tipping or spilling while mixing bone or other bone grafting materials
- Bone Compactors – feature serrated tips for compacting bone
- Scalpels & Biopsy Punches
- Scalpels – offers convenience of a disposable with razor sharp cutting edge for superior cutting
- Biopsy Punches – designed at a steeper angle to ensure a finely honed, sharper edge
- Bone Spreading Chisels
- Freer Chisels – double or single cut tips used for widening ridges during implant preparations
- Graduated Chisels – feature reference markings for measurement during a bone ridge augmentation and are available in straight and curved patterns

Osteotomes

- Concave Osteotomes – break the floor of the maxillary sinus through the implant cavity and are available in curved (off set) and straight (with or without stops)
- Convex Osteotomes – raise the floor of the maxillary sinus and are available in curved (off-set) and straight patterns (with or without stops)
- Progressive Osteotomes – designed to prepare the implant site in the maxillary area where bone density is 3 or 4
- Bone Spreading Osteotomes – sharp or blunt configurations for progressive circumferential expansion of the implant site

Sinus Lift Instruments

- Sinus Lift Curettes and Elevators – lightweight, wide diameter stainless steel hand instruments lift the sinus membrane for bone augmentation procedures

Gauges & Calipers

- Gauges & Calipers – various measuring devices available to determine appropriate length, width, and distance for implant procedures

Collagen Products

- Collagen wound dressing product offering includes products:

Sterilization Trays

- Sterilization Trays – designed to protect and store instruments during sterilization, transportation and storage

25-079
Mini Periosteal Elevators

25-082 PERIOSTEAL ELEVATOR #413, 3MM WIDE ROUNDED PERIOSTEAL, IN / OUT CONFIGURATIONS
The 'Out' curved tip is perfect for application to the facial as it enables a high angle-of-approach to the periosteum, keeping the handle away from the tissue.

25-083 MICRO BUSER PERIOSTEAL ELEVATOR #643, 3MM ROUNDED PERIOSTEAL / 2.4MM POINTED PERIOSTEAL
The sharp, pointed tip of the Micro Buser Periosteal is ideal for delicate manipulation of the papilla

BONE GRAFTING INSTRUMENTS COMPACTOR /TAMPERS

Product offering includes instruments for harvesting, mixing and compacting bone Provides clinicians with the proper instrumentation for bone grafting procedures Weighted bone basin Prevents tipping and spilling of bone and other materials during mixing

25-117
Graft Packer, Concave Tips DE 4/6mm

25-118
Bone Spoon/ Packer DE 3mm

25-119
Blade and pusher Length 180 mm, for straight or angled, blade: 15 x 5 mm, pusher: 4 mm diameter Straight

25-120
Blade and pusher Length 180 mm, for straight or angled, blade: 15 x 5 mm, pusher: 4 mm diameter angular

25-121
Spoon and pusher Length 180 mm, for angled spoon: 10 x 5 mm, pusher: diameter 3 mm

25-122
Graft Packer, Smooth Tips DE 5/8mm

25-123
Graft Packer, Serrated Tips DE 3/4mm

25-124
Graft Packer, Serrated Tips DE 6/8mm

25-125
Titanium graft packer/ placement site depth gauge 3.3mm & 4.0mm Diameter tips Marked at 8, 11, 13, 15 & 18mm

25-126
Tamper Length 170 mm, for bone material, double-ended, diameter 3.2 mm (2-4-6-8-10) and diameter 2.5mm (2-4-6-8-10)

25-127
Bone Graft Scoop
Large Scoop is 10x25mm, Small Scoop is 5x21
8mm X 30mm

25-128

25-279
Compression Expander Screws Kit
 The Kit Includes:
 Kit Includes
 3x Bone Compression Screws
 1x Sinus Elevation Screw (3.5mm)
 Screws are compatible with any brands 4.0mm Torque Wrench / Ratchet Wrench / Adapter's Kit Advantages
 Screws are Laser marked to indicate the depth of 8mm, 10mm & 13mm

25-280
Hex Drivers Adapter Kit
 The Kit Includes:
 4 Pcs Hex Drivers Kit Fits Ratchet / Torque Wrench 2 x 25mm & 2x 2.5mm Long & Short Driver
 Manufactured from High Grade Stainless Steel - Highly Polished

25-281
Surgical Drill Kit
 The Kit Includes:
1) Twist Drills
 2.0mm, 2.8mm 3.2mm, 3.65mm 4.2mm, 4.8mm, 5.2mm
 With Laser Depth Markings on 6.0mm, 8.0mm, 10.0mm, 11.5mm, 13.0mm & 16.0mm

2) Ratchet / Wrench Hex Drivers (Color Coded)
 1.25mm Short / Long, 2.42mm Short / Long
3) Parallel Pins
 Long & Short
4) Motor Mount Hex
 1.25mm, 2.5mm
5) Ratchet Wrench 4mm
6) Sterilization Cassette / Box / Organizer

25-282
Bone Expander Kit
 The Kit Includes:
1) Expander Screws
 1.6 / 2.6 mm, 1.9 / 3.0 mm, 2.1 / 3.4 mm
 2.6 / 3.8 mm, 2.9 / 4.3 mm
 With Laser Depth Markings on 8mm, 10mm & 11.5mm.

2) Saw Disks
 7.0 mm, 10.0 mm
3) Pilot Drill 1.6mm
4) Hand piece Adapter
5) Ratchet Extender
6) Hand Driver
7) Ratchet Wrench 4.0mm
8) Sterilization Cassette / Box.

25-283
Bone Compact Kit
 The Kit Includes:
1) Twist Drills
 2.0mm, 2.5mm, 2.8mm 3.2mm, 3.65mm, 4.2mm, 5.2mm
 With Laser Depth Markings on 6.0mm, 8.0mm, 10.0mm, 11.5mm, 13.0mm & 16.0mm

2) Ratchet / Wrench Hex Drivers (Color Coded)
 1.25mm Short / Long, 2.42mm Short / Long
3) Contra Angle Hex Drivers
 1.25mm, 2.42mm
4) Parallel Pins Long & Short
5) Drill Extender
6) Marking Drill
7) Ratchet Wrench 6.35mm
8) Sterilization Cassette / Box / Organizer

ENDODONTIC SET**

Includes a large sterilizing cassette,
#5 mirror & handle,
endo explorer DG16,
college pliers with lock,
endo excavator 31L,
root canal spreader D11,
root canal pluggers 5/7, 9/11,
glick pluggers #1,
articulating paper forceps,
type CW aspirating syringe,
IV type rubber dam forceps,
and rubber dam clamps 1, 2, 9, and 26N.

Perfect for basic endo set-up
Stainless steel cassette
Includes 14 instruments + cassette

**27-309
DENTAL AMALGAM
INSTRUMENT SET**

Includes large sterilizing cassette,
#5 mouth mirror and handle,
explorer #5,
excavator #18,
Calcium Hydroxide Placement instrument,
amalgam carrier regular/large,
Black Amalgam Plugger 1/2, 3/8 and
89/92 Cleoid-Discoid Carver,
3S Hollenback Carver,
21B Burnisher,
27/29 Burnisher,
college pliers,
articulating paper forceps,
type CW aspirating syringe,
amalgam well
Perfect for basic restorative set-up
Stainless steel cassette
Includes 15 instruments

**27-310
BASIC ORAL SURGEY SET**

#5 mirror & handle,
scalpel handle #5,
periosteal elevator KNI,
Heidsieck Root Tip Pick 2/3,
12CA bone file,
college pliers,
Canwood-Minnesota Cheek Retractor,
Molt Mouth Gag,
Mayo-Hegar Needle Holder 6",
Mosquito hemostat curved,
Goldman Fox Scissors straight,
Blumenthal Rongeurs 30",
aspirating syringe type C,
and Adson-Brown Tissue Forceps.

Includes 14 instruments in a large
sterilizing cassette
Perfect for all surgeries

**27-311
CROWN AND BRIDGE SET**

#5 mouth mirror & handle,
explorer #5,
probe CP12,
18 excavator,
113 serrated cord packer,
2 Goldstein Composite Instrument,
cement spatula 24,
college pliers,
articulating paper forceps,
type CW aspirating syringe,
its scissors curved

Perfect for crown and bridge procedures
Stainless steel cassette
Includes 11 instrument

Gammax (Quatri)**

Gammax Trays a very practical solution for handling your pliers during cleaning and sterilisation processes. Their GAMMAX trays help organise your pliers in practical set ups and handle them safely. Some of the specific benefits of the GAMMAX trays are inserts made of special non-toxic silicon and open corners to facilitate the outflow of residuals and water, therefore reducing the drying time.
